

POWERING A SMARTER STAY

AT THE SAN FRANCISCO MARRIOTT MARQUIS

SUSTAINABILITY HOTEL-WIDE

At the San Francisco Marriott Marquis, we are committed to being a leader in water, hygiene, and energy technologies to ensure our local communities and broader planet have an optimistic and better future. Some of our sustainability efforts are wide-ranging and some are on the smaller side. Here's what we are proud of:

- Energy-efficient LED lighting in all spaces of the hotel
- All guestroom and public restrooms have been retrofitted city approved water-saving showerheads, toilets, and faucets
- All public restrooms sink faucets have hand motion activation to save water
- Water bottle refill stations are located on the 1st and 2nd floors
- Guestroom's HVAC units are equipped with a centralized Inncom energy system that utilizes digital thermostats, door lock switches, and motion sensors to insure the best possible energy performance.
- All guestroom HVAC motors have been replaced with energy-saving variable speed motors
- Light sensors for energy savings, in offices and storage rooms
- Main HVAC systems are all retrofitted with variable drive technology – electric motor energy savings
- Recycled paper used throughout the hotel
- Trash is hand separated to insure all recyclables are pulled out. The monthly recycle rate is over 80%
- Other special items recycled include cooking grease/oil, batteries, lightbulbs, paints, and electronics
- Purchasing preference is given to local and sustainable product suppliers in order to lower carbon footprint
- Only certified green chemicals from EcoLab are used to clean guestrooms and public spaces.
- Property is in the process of switching to residential amenities which eliminates all the little bottles of soap, shampoo, and conditioner
- All utility usages and bills are reviewed by a 3rd party which helps flag possible energy waste and water leaks.
- Guestrooms are equipped with a cell phone mobile key system – reduces plastic waste
- Hotel holds an " Environmentalist Level " certificate from the California Green Lodging for reducing waste, saving water, energy, and other valuable resources

GREEN CONFERENCES

- Water stations used in all meeting spaces to reduce waste
- Water cups are green and recyclable
- Composting of all food waste
- Trash and recycle are hand separated
- Extra banquet food is donated when appropriate
- Condiments served in bulk
- Pad and paper have been eliminated to reduce waste
- 50% of event tables are linen-less and the hotel continues to convert
- Air Handlers have economizers to utilize outside air to cool the spaces
- Automated HVAC efficiency system conserves energy when meeting rooms are unoccupied
- Online event menus
- Event Space meets California lighting code Title 24 and are equipped LED's, motion, and light level sensors

GREEN IN THE KITCHEN

- Food waste prevention that enables our kitchen to dramatically reduce food waste and operate more sustainable facility
- Weighing food waste to empower smart decisions on purchasing, production, and portioning
- Culinary team sources sustainable, local, and regional products
- Bulk food oil filtration operating system that allows us to reduce cardboard and plastic jug usage and reduces the amount of oil used
- Food donation program is in place
- Online restaurant menus

"WE WANT TO BE KNOWN AS THE WORLD'S FAVORITE TRAVEL COMPANY WHILE FULFILLING OUR GLOBAL RESPONSIBILITY TO BE A FORCE FOR GOOD," SAID DENISE NAGUIB, VICE PRESIDENT, OF SUSTAINABILITY AND SUPPLIER DIVERSITY, MARRIOTT INTERNATIONAL. "PARTNERING WITH A SOLUTIONS PROVIDER SUCH AS ECOLAB HELPS US ACHIEVE OUR SUSTAINABILITY GOALS AND ENSURE THAT WE PROVIDE AN EXEMPLARY EXPERIENCE TO OUR GUESTS."
